Turn90 Playbook

Welcome to the Turn90 Playbook. This resource has been organized into clear, accessible sections detailing our operational procedures and forms.

Program Overview

- Programs & Waitlist Management

Case Management

- 4-Week Gates & The Briefcase
- SkillCat & Case Planning
- Case Management Meetings
- Defining Stability Issues (Removal Criteria)

Apricot Forms Reference

These are the Apricot forms you should be familiar with.

- Client Intake
- Community Program Screening
- Program Enrollment & Exit
- Reentry Nav Case Plan
- First Shift Case Plan
- Briefcase
- Service Record & Case Notes
- Referrals
- Drug Testing
- New Employment Record
- Employment Update
- Companies for Job Placement
- Community Service Organization
- Client Recruitment
- Partner Contacts
- Recruitment Activity
- Recidivism Tracking

Programs Overview

Resource Coordination

Primarily conducted via telephone but accessible in person for walk-in clients, this entry point allows us to meet individuals where they are and connect anyone with a criminal justice background to vital support services.

- Residing in counties outside our service area
- Immediate stabilization resources
- Job placement assistance
- Initial intake for new contacts

As a low-touch service open to any justice-involved individual, Resource Coordination focuses on providing immediate referrals before concluding active engagement. Participants may reconnect at any time; however, ongoing case management is not provided through this track.

Reentry Navigation

Reentry Navigation provides comprehensive support to participants who meet the following criteria:

- Reside within a county served by a Turn90 Center
- Were released from incarceration within the past 3 years
- Have no history of sex offense convictions
- Are at least 18 years of age
- Male

Engagement goals are customized to individual participant needs. Common reasons for participating in Reentry Navigation include:

- Awaiting First Shift enrollment due to a waitlist, during which staff assist with personal goals and early preparation
- Seeking targeted support to eliminate specific barriers without enrolling in First Shift
- Ineligibility for First Shift while remaining strong candidates for general navigation services
- Temporary ineligibility for First Shift resulting from:
 - Fewer than 12 months of sobriety without completing a formal substance use treatment program
 - Unresolved housing or transportation instability required for program readiness
 - Significant health or age-related barriers impacting employment readiness
- Removal from First Shift due to non-compliance with program requirements:
 - Some receive a plan outlining action steps to rejoin First Shift
 - Others remain eligible only for Reentry Navigation support
 - Services are fully terminated in severe instances involving violence, safety threats, or harassment to safeguard staff

- Specific criminal records that restrict placement with local commercial employers

Ultimately, Reentry Navigation guides participants toward community resources, job opportunities, and self-defined goals.

Reentry navigation participants should not be referred to job partners that desire placements to have completed First Shift. This will typically be our preferred employers. However, we can and should track job placements through the New Employment form. Even employment secured by the participant on their own should be tracked here.

First Shift

First Shift is an intensive, 8-week rapid employment and training initiative. Participants must maintain personal stability to remain in the program; any disruption in stability requires a transition back to Reentry Navigation. Because of its fast-paced structure, First Shift remains the primary focus for program staff caseloads.

Given the program's intensity, mandatory stability checks and gates are conducted to verify readiness for competitive employment. Should a participant experience significant instability, they are redirected to Reentry Navigation for further preparation.

First Shift targets stability, cognitive skill-building, workforce preparation, and long-term retention.

Aftercare

Aftercare supports former Reentry Navigation and First Shift participants through routine follow-ups, monitoring ongoing stability, employment retention, and recidivism outcomes.

Waitlist Management

- Capacity Cap: Each center maintains a maximum of 6 active First Shift enrollments. Participants in weeks 9-12 are on a half stipend so they count as a half participant.
- Waitlist Status: Eligible candidates are assigned a "waitlist" status within Reentry Navigation via the Community Program Screening until an opening occurs.
- Enrollment Process: Openings are offered chronologically, giving candidates 24 hours to respond. Staff must re-evaluate stability before enrollment. Participants with documented stability issues in Reentry Navigation are removed with an explanatory case note, while unengaged applicants require screening re-verification. When spots are available for First Shift enrollment, we should start with the person who has been on the waitlist the longest. They have 24 hours to respond before moving on to the next participant on the waitlist. A new screening may not be necessary but stability should be reassessed. If the participant has been engaged in Reentry Nav and there are known stability or eligibility issues, that participant should be removed from the waitlist with a case note explaining why. If the

participant has not been engaged with Reentry Nav, then the screening should be reverified.

- Triage Approach: Waitlist management balances fair processing with prioritizing candidates demonstrating the highest potential for success in First Shift. The goal of waitlist management is to triage those on the waitlist and prioritizing those with the most chance for success in First Shift while also treating all those on the list with a level of fairness.
- Prerelease Priority: Individuals who completed a facility-based Turn90 program receive priority placement during waitlist triaging. Prerelease participants are those who were enrolled and completed a Turn90 program inside a correctional facility. They are given priority when triaging the waitlist but not automatically enrolled ahead of others.

Case Management

Purpose:

- The purpose of case management is to provide appropriate support for participants. Reentry Nav case management focuses on the Briefcase and Gates, employment, and removing stability barriers. First Shift case management does the same while also focusing on individual criminogenic patterns.

Notes:

- A reentry navigator handles a participant's case management until that participant exits or moves into First Shift. As soon as a participant attends First Shift orientation, the program staff of the center now manage the case management, even if that participant moves back to reentry navigation.
 - If a participant is scheduled for orientation but does not attend, then they remain on the Navigator's case load.
 - If the participant fails their orientation drug test, they transfer to the program staff of the center.

4-Week Job Placement Readiness Gate

Goal: Verify that each participant possesses the foundational stability, required identification, and medical support necessary to secure and sustain gainful employment.

Guidelines: Requirements do not need to be fully finalized. For instance, an upcoming appointment for state identification or medical care satisfies the readiness benchmark provided it does not delay immediate employment.

Applied across both Reentry Navigation and First Shift, these benchmarks comprise the core elements of the Briefcase form in Apricot, which additionally includes targeted job search plans and health evaluations.

Health & Wellness Observation Screen

Completed directly within the Briefcase form in Apricot, this screen must be submitted and reviewed as part of Gate 3 benchmarks.

The Briefcase & Lab Time

- The Briefcase: The comprehensive portfolio containing essential identification, professional resumes, and earned certifications.
- Lab Time: Designated operational blocks focused exclusively on supporting participants with Briefcase requirements, including document acquisition and resume building.

Operational Rule: Briefcase tasks must not be addressed during individual Case Management sessions. Staff should utilize 1-on-1 meetings to arrange appointments or schedule dedicated Lab Time, linking any outstanding items directly to the participant's case plan.

SkillCat Management

- Account Registration: Register new participants during orientation.
- Account Removal: Deactivate or remove accounts when individuals exit First Shift.

Case Management & Case Planning

Reentry Navigation Case Planning ("If This, Then That" Framework)

This section outlines the action steps and conditional benchmarks for clients working through the 4-Week Gates.

Gate 1: Identification & Initial Stability

These core documents are required to pass I-9 verification and complete payroll processing.

- State Identification / Driver's License: Verify active, valid government photo ID status.
 - IF state ID is lacking, THEN schedule a DMV visit provided the participant holds an official birth record and address verification.
- Social Security Administration Card: Confirm physical document or formal SSA receipt.
 - IF missing the SS card, THEN incorporate an SSA appointment into the plan IF state photo ID and birth documentation exist.
- Birth Certificate:
 - IF birth certificate is absent AND born in South Carolina AND state ID is present, THEN arrange a Vital Statistics appointment in the case plan.
 - IF born out-of-state, THEN research the specific vital records process for their native state.
- Identification Escalation Protocols: Lacking all three forms of identification creates severe barriers, requiring Program Director consultation to establish an action strategy.

Out-of-state documentation adds complex verification delays. For First Shift candidates, evaluate if paperwork delays threaten competitive placement, moving the participant to Reentry Navigation when needed.

- Prescription Access: IF active medications are required, THEN incorporate Welvista or clinical appointments to maintain seamless prescription supplies.
- Medical Coverage Guidance: Review available health coverage options (Welvista, community clinics, Healthcare Exchange). Clarify that Marketplace options involve out-of-pocket copays.
- Justice Supervision Details: IF under active supervision, THEN log the agent's contact details, jurisdiction, and mandatory check-in schedules.
- Personal Growth Target: The participant must reflect on: *Where do I want to be in 90 days? What major accomplishment am I working toward? What progress will make me proud? What builds lasting stability?*
- SkillCat Track Selection: Assign an appropriate curriculum path aligning with criminal history and local job opportunities.

Gate 2: Foundational Logistics

- Child Support Obligations: IF open cases exist, THEN verify details and reach Enforcement using the portal. IF legal challenges arise, THEN establish referral steps in the plan.
- Housing Security: Verify housing remains stable enough to prevent workplace disruptions over the next 30 to 60 days. IF housing issues threaten stability, THEN create a resolution strategy.
- Phone Access: IF reliable phone contact or working voicemail is missing, THEN resolve this item within the active case plan.
- Supervision & Court Mandates: IF probation meetings, legal hearings, or community service conflict with program hours, THEN integrate solutions into the plan.
- Driver's License & DMV: IF driving privileges are suspended, THEN schedule a DMV visit or online check to audit outstanding penalties.
- Professional Email & Resume: IF lacking a professional email, THEN build one into the goals. IF missing a current resume, THEN build one during Lab Time.
- SkillCat Engagement: Maintain steady progress across assigned coursework modules.

Gate 3: Health & Professional Preparation

- Health & Wellness Screening: Staff must complete the observation screen for physical or mental health barriers, adding goals if needs are identified.
- Medical & Vision Needs: IF unaddressed health or vision concerns exist, THEN include doctor or eye clinic appointments in the case plan.
- Mental Health & Prescriptions: Ensure a structured support system is active so participants avoid becoming overwhelmed.
- Financial Banking: IF lacking direct deposit banking (mobile options like Chime or Cash App are acceptable), THEN add account setup to the action items.

Gate 4: Job Placement Readiness

- Work Attire & Equipment: Are specialized supplies required for the target placement? IF so, THEN outline equipment acquisition within the case plan.
- Transportation Strategy: Prior to employer referrals, verify a realistic transit strategy featuring TWO dependable backup methods (personal vehicle, transit pass, carpool).
- Final Employment Readiness: Personal budget completed, savings strategy set, credit history audited, 6-month work strategy documented, and long-term career path defined.

First Shift Case Planning

- LS/CMI Assessment Procedure: Capture full session audio alongside a secondary backup recording.
- AI Integration Workflow: Staff upload interview transcripts to produce a comprehensive AI Case Brief.

Pattern Identification & CBT Skills: The system pinpoints key behavioral tendencies (such as substance use or antisocial patterns), which staff map directly to standard dropdown selections in the Apricot First Shift Case Plan form for weekly CBT exercise practice.

There are two ways to set the First Shift case plan. The Brief outlines the suggested top two-three criminogenic domains, what we call focus areas. Based on the focus area selected, preset patterns drop down. You have the option of "other," if the preset patterns do not match.

The goal of case planning with the participant is ownership. Our program chooses patterns based on evidence based and empirical data, however, we want the participant to own and define their own patterns. The participants receive the action plan that is created at the same time as the brief. This action plan lives with their Companion Guide. Once they agree on their patterns, they should choose as many triggering situations they can think of for each pattern. These should be situations they WANT to handle well. The participant should write those situations in their action plan and the program manager should note those in the First Shift case plan.

Preparation for Case Management

Staff must evaluate existing case notes, active case plans, referrals, accrued points, pattern cards linked to the participant's strategy, and current Briefcase documentation prior to individual sessions.

Weekly case planning assessments require evaluating the following areas:

- Stability Concerns: Screen for active stability issues based on established removal criteria.
- Barrier Identification: Identify immediate participant needs, determining whether local center capacity supports rapid resolution or if external community resources are required.
- First Shift Progress Verification:
 - Confirming satisfactory attendance and active attendance records.
 - Assessing comprehension and application of Phase 2 core concepts.

- Evaluating ongoing progress in resolving barriers that impact competitive employment.
- Reviewing engagement in Cognitive Behavioral Intervention (CBI) activities, including homework completion, active discussion, and genuine effort during role-play exercises.
- Job Placement Viability:
 - Ensuring reliable transportation covers target employment locations without ongoing staff intervention.
 - Verifying candidate qualifications against employer requirements, including conviction history exclusions, required industry credentials, and minimum educational standards.
 - Confirming schedule availability aligns with supervision mandates, public safety restrictions (such as overnight work limits), and facility curfew rules.

Key components to audit during case plan reviews include:

- Identified stability or engagement concerns
- Targeted employment strategies and placement goals
- Integration of behavioral pattern cards into regular 1-on-1 skill practice
- Audit of 4-Week Gate benchmarks and Briefcase portfolio status

Case Management Session Structure

Standard 1-on-1 case management sessions follow this timed agenda:

- General Check-in (2–5 minutes): Initial rapport building and immediate updates.
- Briefcase Portfolio Review (5 minutes): Audit document progress. Note that portfolio tasks must be deferred to dedicated Lab Time, though staff may schedule required appointments during this window.
- Referral Follow-up (5 minutes): Review outstanding connections to external resources.
- Skill Practice (20 minutes): Dedicated practice of behavioral skills outlined in the case plan by working on one of their stated situations.
- Goal Setting (5 minutes): Establish actionable objectives for the upcoming week. These can be simple or small goals based on behaviors or the briefcase. Sample goals are
 - Go to the DMV
 - Stay calm when my partner disrespects me
 - Attend at least 3 AA meetings
 - Go to the gym and workout
 - Do better with skillcat engagement
- Session Wrap-up (5 minutes): Finalize documentation and confirm next steps.

Defining Stability Issues (Removal Criteria)

An occurrence of any of the following stability concerns necessitates transitioning the participant from First Shift back into Reentry Navigation, unless an explicit override is granted by the Program Director:

- New Information Limiting Job Placement Opportunities:
 - Undisclosed history of sexual offense convictions
 - Active permanent restraining orders (PRO)
 - Recent significant substance use
- Housing Instability:
 - Temporary residence in a motel
 - Unsheltered or experiencing homelessness
 - Pending eviction proceedings
 - Past-due rental obligations without a viable payment plan or funds
- Substance Abuse Concerns:
 - Positive screening on a drug test or breathalyzer
 - Noticeable odor of alcohol or marijuana
- Legal & Supervision Challenges:
 - New arrest or pending charges
 - Restrictive community supervision conditions
- Two or more unexcused, unplanned absences
- Any single instance of No Call, No Show (NCNS)
- Anticipated relocation outside the service region within six months
- Court Mandates:
 - Probation, parole, or family court obligations requiring multi-day or daily attendance during program operation hours
- Childcare Disruptions:
 - Sudden loss of primary childcare arrangements lacking immediate backup options, resulting in multi-day absences
- Transportation Barriers:
 - Primary vehicle failure without accessible repair options
 - Loss of reliable rides where public transportation alternatives are impractical
 - Inability of center transit supports (e.g., passes or rideshare services) to resolve the gap
- Mental Health Emergencies:
 - Acute psychiatric crisis requiring inpatient treatment, medication adjustments causing severe impairment, or an inability to maintain safe behavior in group settings
- Physical Health Concerns:
 - Acute medical conditions, traumatic injuries, or essential procedures requiring extended bed rest or severely impacting mobility

Data Review & Auditing Process

Regular quality assurance audits ensure operational fidelity and accurate reporting across all program areas.

Weekly Audits (Program Managers)

- Confirm that an active Service Record or Case Note is documented for every enrolled participant.
- Verify complete logging of weekly Drug Testing outcomes.
- Ensure immediate updates to Enrollment status whenever stability issues occur, transferring eligible participants from First Shift to Reentry Navigation as appropriate.

Monthly Audits (Center Directors)

- Audit and validate overall Waitlist accuracy.
- Review Employment Updates to ensure mandatory 30-day or quarterly check-ins are logged for all program graduates within their 12-month follow-up window.
- Verify accurate documentation for all Briefcase portfolio milestones completed during Lab Time.

Quarterly Audits (Program Director)

- Evaluate LS/CMI assessment consistency and integration of AI Case Briefs across all center operations.
- Analyze quarterly performance metrics regarding Job Placements, 30-day and 12-month Retention Rates, and Reentry Navigation completion benchmarks.

Conduct systemic data compliance checks to ensure records contain no missing or incomplete documentation.

First Shift Payment Process

- Case managers log point totals on a daily basis.
- At the conclusion of the work week (Friday afternoon or Monday morning), the Program Director or designated staff member completes the following actions:
 - Navigate to Apricot report modules.
 - Generate the "first shift pay report" covering the prior weekly period (Monday through Friday).
 - Export and download the generated file.
- Import the exported file into Google Sheets or an equivalent spreadsheet application.
- Insert the calculation formula to determine total compensation:
 - Utilize SUMIF logic: =SUMIF(A:A, A2, E:E)*9
 - Enter this formula on the initial line item corresponding to each participant.

Audit all calculations to ensure overall payment accuracy across every participant record.

Program Operations

- Accurate tracking and recording of daily points
- Instructional preparation prior to sessions
- Maintaining accountability utilizing SYNAPSE and CCPS tools

- Adherence to standardized procedures and established guidelines

Client Intake

Purpose:

Establishes the foundational record for anyone accessing services, capturing core demographics, contact details, and initial screening criteria.

When to Complete:

- Log upon initial contact or initial intake.
- Check for prior entries. You should update an existing entry if there has been a previous entry for that person.
- Date of Birth and Social Security Number are not collected until later, as needed. Reasons to collect the DOB and SSN are for job placement purposes and/or assistance with resource applications. Therefore, collection is not necessary until program (Reentry Nav or First Shift) enrollment.

When to update:

- Updates should be made when information changes. This is most likely to be a phone, email, or physical address change.

Other notes:

- Only the legal name should be recorded. Nicknames or religious changes to names should not be recorded.
- Current physical address where the participant is sleeping
- We do collect basic information on family or friends of a justice involved person when they reach out to contact us. They receive a client intake and we log what referrals were given to them.

Community Program Screening Form

Purpose:

Identifies what program services a participant is eligible for. This form determines eligibility, collects information in order to build a comprehensive case plan, and manages the First Shift waitlist.

When to Complete:

A Community Program Screening must be created when screening a new participant, if we have lost contact for more than 60 days, or if a participant's situation has changed in between program enrollments.

A new screening DOES NOT have to be created if a participant is transitioning directly from Reentry Nav to First Shift or First Shift to Reentry Nav, as long as the participant has maintained contact. New stability issues would be captured in the case plan, brief, and/or service records.

A new screening DOES have to be created if the participant was enrolled in prerelease and is now coming into community programming.

When to Update:

- Details should only be updated during the initial process. This can take several days in the case of verifying criminal charges. It should only be updated in that short period of time if details are contradictory to collateral information.
- If details change at a late date, then those details should be logged in service records if the participant is still enrolled in a program. A new screening should be done if the participant has exited and is reentering with new stability issues or new arrests.

Other notes:

- The LSCMI's definition of incarceration and our program definition for eligibility are different. For Turn90 program eligibility, Incarceration covers any arrest incident, including brief stays in local detention facilities.
- Assistance remains possible if a sexual offense conviction was connected to a kidnapping charge lacking sexual components, or a single offense qualified for registry removal. Focus is placed on identifying recurring sexual patterns. When uncertain, escalate to a program director for potential override.

Managing Waitlist:

- This date can change based on different scenarios. If a prerelease participant is knowingly coming to Turn90 center upon release, we can create their screening and add to the waitlist to secure a spot. If someone fails to make orientation, we can adjust this date to move them to the back of the waitlist. We can use this date field to manipulate the waitlist as we triage. This is the only way to adjust someone's priority or spot on the waitlist.

Program Enrollment & Exit

Purpose:

Logs enrollment, completion, and exit reasons.

When to Complete:

- Required whenever anyone starts a Prerelease, Reentry Nav, or First Shift program.
- Program enrollment must be closed/exited before a new one is created.
- A new program enrollment is required whenever anyone starts a Prerelease, Reentry Nav, or First Shift program. A participant can not be enrolled in more than one program so every program enrollment must be closed/exited before a new one is created. Participants may have multiple enrolments over time as they transition in and out of programs and/or incarceration.

Other Notes:

- Add case notes when people are exited or transferred between services. If enrolling from the waitlist, then you must go to their screening and be removed from the waitlist.
- Do NOT enroll a participant into First Shift until the first day that participant begins class.

Enrollment & Exit Triggers

- **Pre-Release:**
 - **Enroll:** When a participant inside a correctional facility enrolls in a Turn90 program.
 - **Exit:**
- **Reentry Navigation:**

- **Enroll:** When an eligible participant is not yet stable enough for First Shift, OR if they lose stability during First Shift, OR if they are placed on the waitlist, OR if they are not interested in First Shift.
- **Exit:** When they achieve baseline stability (pass the 4-Week Gates) and transition to First Shift, OR if they disengage completely for 90 days, OR if they choose to disengage, OR if they
- **First Shift:**
 - **Enroll:** When a participant completes Reentry Nav (or enters directly), is stable, legally/physically able to work, and space is available.
 - All enrollments should be on the first day of the week.
 - **Exit (Successful):** Upon job placement or completion. Transition to Aftercare and Employment Tracking.
 - **Exit (Unsuccessful):** Immediate demotion to Reentry Nav if they lose stability (e.g., lost housing, failed drug test, new arrest, NCNS).

First Shift Orientation

Purpose:

Goes over First Shift participation in depth, confirms participants ability to pass a drug test, completes W9 paperwork, and completes LSCMI automated interview.

When to complete:

Any time a participant enrolls into First Shift, they must complete orientation. This includes participants re-enrolling.

Orientation is completed at 3:30 on Fridays. They may be adjusted if the Center Director is not available to complete it but they should be done the week prior to their Monday start date.

Orientation Schedule and Materials:

First Shift Materials Preparation

- Access all First Shift documentation within the shared program folder under First Shift Materials.
- Assemble the First Shift orientation packet utilizing the available binding comb machine and plastic spines (same process as module workbooks).
- Orientation Packet Assembly Guidelines:
 - Double-sided printing required for all pages.
 - Pages 1-44: Bind together and hand to the participant.
 - Pages 45-57: Print double-sided and staple separately (do not bind).
 - Pages 45-57 comprise payment card setup, tax documentation, and participant stipend agreements.

Orientation Timeline and Procedures

- Orientation starts promptly at 3:30 PM.
- Initial Step: Administer the mandatory urinalysis drug screening.
 - Group Intakes: Limit drug screen wait times to 15 minutes max (conclude by 3:45 PM).

- Individual Intakes: Staff may allow slight flexibility, but wait times must not exceed 30 minutes.
- Inability to produce a specimen typically indicates high risk of failure.

Orientation Packet & Payroll Documentation

- Following drug testing, walk through orientation materials with the candidate, reviewing all program standards.
- Ensure the candidate completes all payroll forms (pages 45–57).
- Pages 45–57 must be scanned and uploaded
 - Make sure forms are filled out
 - Make sure page 45 is filled out correctly
 - Fill in the participant's Apricot ID on page 45
 - Scan the file
 - Name the file *firstname_lastname_w9*
 - Upload to the First Shift W9's folder in the Program drive.

Assessment Session Protocol

- Log into the portal so the participant can complete the automated screening interview.
- Recommended Practice: Run an audio recorder during the session to safeguard against network outages, allowing subsequent manual upload.

Completing the Assessment

- The LSCMI scoring in the app has a human-in-the-loop process.
- A Center Director or Program Director must review the scoring, make edits, and complete the assessment. You **MUST** be trained and certified in the LSCMI to complete the process.
- Upon completion, the app provides the
 - Brief- to be uploaded in the First Shift Case Plan
 - Participant Action Plan- to be uploaded in the First Shift Case Plan
 - Interview Transcript- to be uploaded to LSCMI Documents in the participant's folder
 - Completed Interview Guide- to be uploaded to LSCMI Documents in the participant's folder
 - Completed Scoring Form- to be uploaded to LSCMI Documents in the participant's folder

Completing Scoring

- Once the scoring is finalized, the LSCMI scoring section in the program enrollment should be completed.

Referrals

Purpose:

Documents external partner referrals submitted to address participant stability barriers or to others in Resource Coordination.

When to Complete:

- Log whenever connecting a participant to community providers for supportive services.
- Log whenever any referral is made for someone who has a Client Intake

Action Steps:

- Referral Details: Input Referral Date and assigned Staff Assessor.
- Need & Organization:
 - Select Primary Need category (e.g., Housing, Basic Needs, Medical).
 - Input target Agency Name or prospective employer.
- Outcome Tracking:
 - Update Referral Outcome once service delivery is confirmed.
 - If service was not provided, specify the underlying barrier.

Other Notes:

- Can be generated directly inside the participant file independently, or embedded within a service record during ongoing case management.

Service Record & Case Notes

Purpose:

Logs weekly case management coaching, check-ins, behavioral incidents, attendance updates, and financial support.

When to Complete:

- Complete weekly during First Shift case management.
- Complete immediately following consultation meetings.
- Complete following Reentry Nav meetings
- Document notable behavioral incidents, absences, or financial assistance transactions.
- Any No Call No Show (NCNS), defined as failure to alert staff before the start of the day that they will be absent or late, and any excused or unexcused absence should be noted in a case note. For the purpose of removal from First Shift, a NCNS must exceed 3 hours no notice.

First Shift Case Plan

Purpose:

To address criminogenic patterns that have caused problems for the participant.

When to complete:**First Shift Case Plan Creation Process**

- Center director creates the first shift case plan after the case management brief is completed.
- The case management brief is completed within the Turn90 app.
 - The brief is based on the participant's interview recording from orientation.
- Center director creates the case plan, links it to the participant's enrollment, and uploads the PDF case management brief and participant action plan for the program manager.

Program Manager Review and Follow-up

- Program manager reviews the case management brief before the initial meeting with the participant in the first week.
- During the first meeting, the program manager completes the remaining fields in the case plan.

- Discussion focuses on the participant's goals at Turn90 and patterns to address, as identified in the brief. The participant gives feedback on their action plan and identifies situations that could trigger the pattern.
- The completed case brief is saved and referenced in future sessions.

When to update:

- The plan should only be updated if the participant does not agree with the plan. That should be discussed before completing the form in Apricot.
- Any changes or updates to the plan requires consultation with the Program Director.

Reentry Nav Case Plan Form

Purpose:

- Identifies specific stability barriers, conditions and goals for participants to complete. This can also be requirements they must resolve in Reentry Nav prior to First Shift transition.

When to complete:

- After Reentry Consultation

When to update:

- Updates should be tracked through service records. If a participant exits and enrolls again, a new case plan should be updated.

Briefcase Form

Purpose:

- The Briefcase keeps track of a participant's stability and requirements for employment. There are 4 gates for the participant to clear to ensure maximum success of job placement. These 4 gates are

When to complete:

- A briefcase should be completed whenever someone enrolls in Reentry Nav or First Shift

When to update:

- It should be checked regularly as participants complete items. The purpose of lab time is to address briefcase items.

Other notes:

- A briefcase follows a participant if they immediately transition from Reentry Nav to First Shift or vice versa.
- The 4 gates must be cleared by a First Shift participant within the first 4 weeks of enrollment or move back to Reentry Nav.

Drug Testing

Purpose:

Logs routine weekly drug and alcohol screening results.

When to Complete:

- Submit immediately after administering any drug screen or breathalyzer test.

Drug Testing Policy

- **Pre-enrollment:** All participants must be tested prior to orientation beginning. Failing for any drug, smelling like marijuana, or smelling like alcohol is immediate termination of orientation and the participant can not start.
- **On-Site Impairment:** Any participant suspected of active use during program hours must be suspended/fired and sent home immediately.
- **Weekly Testing:** participants are randomly tested once a week. Drug testing must be supervised and temperatures checked immediately. You DO NOT have to visually watch them provide the sample, but you should be within listening distance to rule out tampering. Tests are performed at 10:25 am, allowing a 5 minute window to test before break time. Anyone unable to provide a sample should be told to provide a sample during Q2 and reminded they must provide a sample before leaving the building.
- **Marijuana (THC):** If positive for THC only, we can restart or re-add to the First Shift waitlist if the participant returns weekly for at least 4 weeks at a scheduled time and passes a drug test.
- **Other Drugs:** Any other drugs require that participant to be removed from First Shift with any return to First Shift in the future only happening after they complete a recognized substance abuse program or remain sober for at least 12 months. While sobriety can not necessarily be verified, we can assume the ability to maintain employment, housing, and lack of justice involvement as good indicators of sobriety.
- **Irregular Tests (Temperature/Tampering):**
 - **Out of Temp:** Address immediately. Explain the impossibility of the temp without adulteration. Offer a chance for honesty. If dishonest, terminate. If honest, retest immediately.
 - **Dark Lines (Synthetic):** If lines are suspiciously dark, conduct a secondary screen later in the day.
- **Refusals:** Refusing to test, leaving the center, or failing to produce a sample is grounds for immediate termination.
- **Retesting:** Must be done immediately (no leaving the building). Passing the second test requires no action. Failing the second test (even for THC) warrants termination for lack of honesty.

New Employment Form

Purpose:

Captures baseline job placement details to monitor initial employment retention and job stability.

When to Complete:

- Complete immediately once a participant secures employment upon exit.

Other notes:

- Confirm participants have committed to the Job Placement Agreement requirements before logging placement.

- Even participants who secure their own placement, an employment form should be completed.

Job Placement Agreement

The job placement agreement is reviewed with a participant BEFORE they are job placed. This agreement reviews Turn90 expectations for who that participant will conduct themselves in the next stage of their journey at a Turn90 job partner. The agreement should be reviewed, signed, and then uploaded to the participant's Apricot file in the Client Documents section.

Job Placement Agreement

Employment Update Form

Purpose:

Tracks ongoing retention, wage growth, and job changes over time.

When to Complete:

- First 6 Months: Submit an update every 30 days (Days 30, 60, 90, 120, 180).
- Months 6 to 12: Submit quarterly updates at Month 9 (Day 270) and Month 12 (Day 365).
- Ad-hoc: Submit immediately upon learning of position changes, wage increases, or employment separation.

Recidivism Tracking

Purpose:

Tracks post-program justice involvement, documenting technical supervision breaches, fresh offense details, and judicial system outcomes.

When to Complete:

Log immediately upon discovering a participant's rearrest, technical violation, or active court proceedings.

Companies for Job Placement

Community Service Organization Form

Client Recruitment

Client recruitment is the activity of developing relationships with correctional institutions and staff to create a pipeline of participants who can access Turn90 services upon release.

Partner Contacts Form

Partner contacts are the relationships we have with staff at correctional institutions.

Recruitment Activity Form

LSCMI Documents

Purpose:

This is the form in apricot where we store the LSCMI documents. It has uploads for the interview transcript, criminal background (state and federal), the completed interview guide, and the completed scoring manual.

Criminal History Check

 Criminal History Check Procedure_2024.02.01.pdf

Credentials

Purpose:

This section is to track credentials earned by participants at Turn90.

When to complete:

Add a new credential whenever a participant earns a new credential

Daily First Shift Points

First Shift Site Enrollment Process

When to Complete:

Following First Shift enrollment, register the participant in the designated site for tracking daily performance points.

When to update:

Add when someone enrolls into First Shift and remove when they exit.

Action Steps:

- Navigate to Search Records in Apricot and locate First Shift Site.
- Select the specific facility location to manage participant assignments.
- Select Edit in the upper right corner if the screen indicates no associated forms.

Adding Participants:

- Select Clients, click Add, locate the individual by name, and assign them to the location.

Removing Participants:

- Select the trash icon adjacent to the individual's record.
- Use page navigation to review additional records past the default five-person display.
- Select Save Record to finalize all updates.

Daily Points Entry and Tracking

When to Complete:

- Log points daily, ideally prior to 5:00 PM.

Action Steps:

- From the Apricot main dashboard, open Track FS Daily Status.
- Identify and open the target site location.
- Verify the entry date, modifying the field if recording retrospective data.

Individual Scoring Protocols:

- Mark checkboxes corresponding to points earned; leave unearned categories unchecked.
- Assign two points for completed homework assignments.

Bulk Entry Options:

- Utilize the universal entry tool at the top to populate identical scores across all participants, then adjust individual variances.
- Select Save Record to store data.

Other Notes:

- All points and attendance entries populate directly into individual participant files.
- Historical point tallies and daily logs are stored under the FS Daily Status Tracker section within the participant folder.

Data Dictionary

Label	Type	Definition
Client Intake	Tier 1 Form ▾	A tier one Apricot form that houses basic biographical and contact information.
Apricot ID	Term ▾	Identification number assigned to the participant at record creation. This is used for reporting and payment information as a unique identifier.
Justice Involved	Term ▾	This is any person who has been involved in the justice system at any point in their life at any level above a misdemeanor traffic ticket.
Currently Justice Involved	Term ▾	Defined as active community supervision, halfway house placement, or active open court cases with regular justice contact.
Relationship	Term ▾	Relationship to the justice system. Our two categories are a person who has been justice involved or a person connected to someone who has been justice involved. This would be family or friends of a justice involved person.
Community Program Screening Form	Tier 2 Form ▾	Form used to determine program eligibility, collect information to aid in case planning, and manage First Shift waitlist.

Resource Coordination	Term ▾	Primarily conducted via telephone but accessible in person for walk-in clients, this entry point allows us to meet individuals where they are and connect anyone with a criminal justice background to vital support services. • Residing in counties outside our service area • Immediate stabilization resources • Job placement assistance • Initial intake for new contacts As a low-touch service open to any justice-involved individual, Resource Coordination focuses on providing immediate referrals before concluding active engagement. Participants may reconnect at any time; however, ongoing case management is not provided through this track.
Resource Coordination Screening	Term ▾	The section in the Community Program Screening Form that determines eligibility for Resource Coordination and also acts as the first gate into Reentry Navigation.
Reentry Navigation	Term ▾	Reentry Navigation provides comprehensive support to participants who meet the criteria. Engagement goals are customized to individual participant needs. Reentry Navigation guides participants toward community resources, job opportunities, and self-defined goals.
Reentry Consultation	Term ▾	A 30 minute meeting where this section The section in the Community Program Screening Form that collects information to determine eligibility and collect information in order to build a comprehensive case plan.
Collateral Information	Term ▾	Supplementary data gathered from third-party sources such as background services, internet searches, or court officials
Court Official	Term ▾	A person directly employed or working closely with the court system. This can be judges, prosecutors, probation officers or law enforcement, or public defenders. Paid attorneys are not court officials.
Eligible County	Term ▾	Eligible counties are the counties where a Turn90 center serves Reentry Nav and First Shift. You MUST be residing in one of these counties on the day of your enrollment to be eligible for services. These are Greenville and Spartanburg in the Upstate region, Lexington and Richland in the Midlands, and Charleston, Berkeley, and Dorchester in the Lowcountry.
Gender	Term ▾	Refers strictly to gender assigned at birth.

Unstable housing	Term ▾	Highly unstable housing include couch surfing, frequent address changes, lacking key access, or living in storage units. Hotel or motel stays are classed as unstable due to cost and being in high crime area.
Referral Source	Term ▾	Referrals are linked to institutional partners (SCDC, Probation/Parole, Halfway Houses, Courts) to track referral sources from those institutions. The other referral options are not currently linked to anything.
Realistic Transportation Plan	Term ▾	A plan that includes a reliable form of transportation with at least one back up plan.
Major Alcohol Abuse	Term ▾	Alcohol use leading to severe life disruptions, damaged relationships, DUI offenses, or physical altercations while impaired
Drug Abuse	Term ▾	Illicit drug use causing life disruptions, relationship breakdowns, criminal involvement, theft while under influence, or illegal acts to obtain substances. This includes abuse of prescription drugs.
Substance Abuse Program	Term ▾	A recognized program with a good reputation. AA/NA or other voluntary groups are not sufficient to qualify.
Conviction/Disposition	Term ▾	Preface juvy convictions
Incarceration	Term ▾	Incarceration requires an actual judicial sentence to jail or prison (time served included). For juvenile convictions, this could also be sentenced to a youth program or camp. Pretrial detention ending in acquittal is not counted as incarceration, though it fulfills recently released requirements for program eligibility.
Jail	Term ▾	A local detention center operated by a county, city, or town
Prison	Term ▾	A correctional facility operated by a state or federal authority
Violent Offense	Term ▾	Violent offenses includes murder; attempted murder; assault and battery by mob, first degree, resulting in death; criminal sexual conduct in the first and second degree; criminal sexual conduct with minors, first, second, and third degree; assault with intent to commit criminal sexual conduct, first and second degree; assault and battery with intent to kill; assault and battery of a high and aggravated nature; kidnapping; trafficking in persons; voluntary manslaughter; armed robbery; attempted armed robbery; carjacking; drug trafficking as defined in Section 44-53-370(e) or trafficking cocaine base as defined in Section 44-53-375(C); manufacturing or trafficking methamphetamine as defined in Section 44-53-375; arson in the first degree; arson in the second

		degree; burglary in the first degree; burglary in the second degree; engaging a child for a sexual performance; homicide by child abuse; aiding and abetting homicide by child abuse; inflicting great bodily injury upon a child; allowing great bodily injury to be inflicted upon a child; domestic violence of a high and aggravated nature; domestic violence in the first degree; abuse or neglect of a vulnerable adult resulting in death; abuse or neglect of a vulnerable adult resulting in great bodily injury; taking of a hostage by an inmate; detonating a destructive device upon the capitol grounds resulting in death with malice; spousal sexual battery; producing, directing, or promoting sexual performance by a child; sexual exploitation of a minor first degree; sexual exploitation of a minor second degree; promoting prostitution of a minor; participating in prostitution of a minor; aggravated voyeurism; detonating a destructive device resulting in death with malice; detonating a destructive device resulting in death without malice; boating under the influence resulting in death; vessel operator's failure to render assistance resulting in death; damaging an airport facility or removing equipment resulting in death; failure to stop when signaled by a law enforcement vehicle resulting in death; interference with traffic-control devices, railroad signs, or signals resulting in death; hit and run resulting in death; felony driving under the influence or felony driving with an unlawful alcohol concentration resulting in death; putting destructive or injurious materials on a highway resulting in death; obstruction of a railroad resulting in death; accessory before the fact to commit any of the above offenses; and attempt to commit any of the above offenses.
Sex Offense	Term ▾	criminal sexual conduct; first, second and third degree criminal sexual conduct with minors; first- and second-degree assault with the intent to commit a criminal sexual act; soliciting and/or engaging a minor for a sexual act; sexual battery upon your spouse; producing, directing, or promoting child pornography; first- or second-degree sexual exploitation of a minor; promoting child prostitution; participating in child prostitution; and aggravated voyeurism.
Diverted Sentence	Term ▾	Sentence diversion occurs when program placement is mandated as a supervision term via formal judicial agreement.
Date added to waitlist	Term ▾	This date can change based on different scenarios. If a prerelease participant is knowingly coming to Turn90 center upon release, we can create their screening and add to the waitlist to secure a spot. If

		someone fails to make orientation, we can adjust this date to move them to the back of the waitlist. We can use this date field to manipulate the waitlist as we triage. This is the only way to adjust someone's priority or spot on the waitlist.
Program Enrollment	Term ▾	A new program enrollment is required whenever anyone starts a Prerelease, Reentry Nav, or First Shift program. A participant can not be enrolled in more than one program so every program enrollment must be closed/exited before a new one is created. Participants may have multiple enrolments over time as they transition in and out of programs and/or incarceration.
Program Exit	Term ▾	A program enrollment must have an exit when a participant moves between programs or exits into the community or out of prerelease program. A reason for program exit is needed.
Prerelease Program	Term ▾	Applies to facility-based Pre-release instruction inside correctional institutions.
Referral	Tier 2 Form ▾	This form logs referrals to community service organizations.
Service Record & Case Notes	Tier 2 Form ▾	Form used to log participant information such as weekly case management coaching, check-ins, behavioral incidents, attendance updates, and financial support.
Recidivism	Term ▾	Relapse into criminal behavior after they have already been convicted, punished, or served a sentence for a prior offense
