

Re-entry Navigation Case Plan: Marcus Johnson

Forensic Clinical Assessment & Case Summary

Marcus Johnson presents with strong motivation for stable, day-shift employment (\$18+/hr) in warehouse, forklift, or framing trades, with long-term aspirations toward earning a CDL-B. His core dynamic criminogenic risk factors center around employment/financial deficits and unresolved child support obligations that have led to driver's license suspension. Primary stability red flags include unmanaged hypertension due to lack of medication access and temporary housing (< 45 days with a friend).

Facilitation & CBT Coaching Strategies

- **Modeling Neutrality (1.5):** Refrain from challenging systemic frustration regarding child support liens or SCDMV reinstatement fees. Reflect back the reality of the situation neutrally: "It sounds exhausting to feel held back by past debt when you are ready to work. Let's look at how setting up a payment plan through Father to Father directly protects your paycheck and opens up CDL options."
- **Managing Resistance & Buy-In (3.2 & 18.0):** Connect child support modification and SCDMV administrative steps directly to Marcus's self-interest—keeping 100% of his wages safe from unexpected garnishment and unlocking higher-paying CDL-B positions.

Priority Action Steps & Triage Plan

1. **Health Triage:** Complete Welvista enrollment immediately for blood pressure medication delivery.
2. **Child Support & License Restoration:** Refer to Father to Father Project to request child support court review and initiate Route 66 reinstatement process at Leeds Ave SCDMV.
3. **Employment Match:** Place Marcus in immediate day-shift fair-chance opportunities (e.g., Palmetto Logistics, Lowcountry Framing) that respect his 9:00 PM SCDPPPS probation curfew.
4. **Housing Stabilization:** Partner with Origin SC for budget planning and long-term housing navigation.
