

Re-entry Navigation Case Plan: Christopher Barranco

1. Clinical Risk & Criminogenic Profile

- **LS/CMI Score:** 21 / 43 (High Risk / Need Category)
- **Primary Domain (ADP - 5/8):** Chronic substance use starting at age 13; severe relapse driver for all historic criminal offenses.
- **Secondary Domain (EE - 5/9):** Associate's Degree in Accounting (Midlands Tech) and trade expertise in gutter installation/roofing; however, lack of stable 12-month payroll and recent unemployment elevate risk.
- **Tertiary Domain (PA/AP - 2/4):** Active property/shoplifting offending within the last 12 months scores supportive of crime, requiring CBT focus on cognitive distortions.
- **Protective Strengths:** Oxford House President, active church volunteer/usher, formal accounting education, high trade skill set.

2. Immediate Clinical Triage & Legal Stabilization

1. **Probation Warrant Mitigation:** Coordinate directly with Agent Burgess (Kershaw PPP) to present Turn90 progress and establish a formal compliance agreement.
2. **Lexington DUS Resolution:** Engage SC Legal Services and Midlands Fatherhood Coalition to address pending DUS 1st court date and structure a manageable SCDMV payment plan.
3. **Debt Management:** Utilize his accounting background to co-create a 'Debt Snowball' budget targeting his \$3,500 debt to Landmark, alleviating financial anxiety.

3. Workplace & Facilitation Plan

- **Facilitation Protocol:** Use neutral curiosity (Standard 1.5) and trauma-informed collaborative coaching. Avoid confrontational directives.
- **Workplace Vetting:** Match only with verified drug-free employers (e.g., commercial maintenance, structural steel, or warehouse logistics) that respect physical lung limitations and maintain prosocial peer cultures.
