

Re-entry Navigation Case Plan: Jarvior Xavier Frazier-Butler

Participant Profile: Jarvior Xavier Frazier-Butler | **Age:** 24 | **Supervision:** State Probation (Charleston County)

Housing: Shield Ministries Cottage Housing (High Stability) | **LS/CMI Risk Level:** High (24/43)

Primary Clinical Target: Antisocial Cognition & Workplace Stabilization

1. Executive Summary & Dynamic Needs Assessment

Jarvior presents a **High Risk / High Needs** profile with strong motivation tied to family unification and stability. While his housing at Shield Ministries is currently highly stable, his primary dynamic risk factors include **Antisocial Cognition** (*Justifying* and *Cut-Off* thinking patterns), **Workplace Deficits** (0 payroll months in last 12), and **Authority Sensitivity** rooted in childhood family trauma. Static risk (juvenile record, past convictions) is noted but excluded from treatment targeting.

Acute Triage Items (First 30 Days):

1. **Medication Continuity:** Secure uninterrupted supply of Remeron (mirtazapine) via Welvista / Fetter Health Care.
 2. **Transportation Infrastructure:** Map CARTA bus routes for program attendance; initiate license restoration work.
 3. **Legal Clarification:** Verify whether pending charges/warrants exist to preserve probation status.
 4. **Program Fee Coordination:** Establish fee-deferral or transitional stipend plan for Shield Ministries fees.
-

2. Clinical & Facilitation Coaching Plan (Turn90 CBT Standards)

- **Modeling Neutrality (Standard 1.5):** When Jarvior displays rationalizations ('some crimes are justified'), staff must remain non-judgmental. Avoid debating ethics or morality. Utilize reflective inquiry: "*When you held that rule in the past, did it get you closer to being with your family or did it cost you your freedom?*"
 - **Managing Frustration & Resistance (Standards 3.2 & 18.0):** Address his *Cut Off* pattern early. Frame all program expectations around his core self-interests: maintaining independence, providing for his kids, and avoiding probation sanctions.
 - **Authority Sensitivity Trauma-Informed Approach:** Given his history of resisting arrest and emotional volatility with law enforcement, staff must maintain a predictable, collaborative, and non-confrontational coaching style. Reinforce his current positive relationship with his probation officer.
-

3. Measurable Action Goals

- **Goal 1 (Health & Stability):** Secure a 90-day refill of Remeron through Welvista by Week 2.
- **Goal 2 (Transit & Legal):** Attend an intake session with Father to Father Project for driver's license restoration and child support alignment by Week 3.
- **Goal 3 (Employment Placement):** Complete 2 interviews with fair-chance employers in demolition, landscape enhancement, or logistics by Week 4.

- **Goal 4 (CBT Mastery):** Complete Carey Guides modules on *Justifying* and *Problem-Solving* with 80%+ compliance by Week 4.
