

Re-entry Navigation Case Plan: Keyzelle Thomas

Staff Contact: Turn90 Re-entry Team

LS/CMI Score: 17/43 (Medium Risk/Need)

Primary Focus: Employment & Dynamic Cognitive Restructuring

1. Dynamic Focus Areas & Clinical Targets

- **Primary Target: School / Work (EE Subscore 5/9):** Zero payroll months in the past year; Associate's degree holder with strong technical ability but disrupted employment history. Goal is placement in a prosocial, fair-chance, first-shift role.
 - **Secondary Target: Procriminal Attitude (PA Subscore 2/4):** Addressing 'technical legal violation' justifications for drug distribution under acute financial stress.
 - **Excluded Target: Criminal History (Static 6/8):** Static factor; excluded from dynamic intervention target selection.
-

2. Clinical & Facilitation Strategies

1. **Modeling Neutrality (Standard 1.5):** Avoid debating past judicial fairness or the legitimacy of drug laws. Ask curiosity-based reflective questions: *'How does carrying that view of the law impact your ability to maintain your freedom and coach your team?'*
 2. **Managing Resistance & Buy-In (Standard 3.2):** Explicitly link every program benchmark to his paternal anchor and youth coaching identity. Frame wage stability as the protection shield for his family.
 3. **Medical Bottleneck Triage:** Prioritize medical clearance for suspected sleep apnea before placing him in high-vigilance or machinery operations to prevent workplace termination.
-

3. Stabilization Steps

- **Housing:** Enroll in transitional housing placement ahead of 11/17/2026 discharge.
- **SCDMV Debt:** Partner with Midlands Fatherhood Coalition to resolve \$300+ tag debt.
- **Health Care:** Schedule primary care / sleep apnea assessment via Cooperative Health.
