

Re-entry Navigation Case Plan: Lokheim Campbell

Participant Profile: Lokheim Campbell (Age 35) | **Location:** Columbia, SC

Legal Status: Federal Supervised Release (Ends Dec 2026) | Federal Halfway House Placement

LS/CMI Risk Level: Medium Risk (Score 17/43) | **Primary Target Domain:** Education & Employment (7/9)

1. Clinical Assessment & Forensic Overview

Lokheim presents with significant motivation for success, high natural self-regulation skills, and strong maternal and peer protective factors. However, spending 16 adult years in high-security federal penitentiaries (USP Pollock/Lee) has resulted in severe hyper-vigilance/PTSD and unpracticed workplace relationship competencies. His current status as unemployed elevates his Education/Employment risk score to 7/9.

Core Criminogenic Dynamic Targets:

- Employment & Education (Dynamic Target):** Address acute unemployment and build daily operational workplace interpersonal skills (coping with supervisor feedback, coworker conflict).
 - Antisocial Cognition (Dynamic Target):** Use CBT cognitive restructuring to address the rationalization that weapon-carrying is a viable self-defense strategy under supervision.
 - Leisure / Unstructured Time (Dynamic Target):** Channel physical fitness focus into structured prosocial community outlets. *Note: Static Criminal History (Subscore 5/8) is excluded from intervention targets per clinical policy.*
-

2. Facilitation & Coaching Protocols (Turn90 Standards)

- Modeling Neutrality (Standard 1.5):** When Lokheim discusses his 2015 firearm conviction or defensive fears, do not debate or lecture. Use reflective curiosity: *"How does carrying a weapon fit with your main goal of never going back to a federal facility?"*
 - Managing Resistance & Trauma Responsivity:** Adopt a calm, non-confrontational, collaborative coaching stance. Avoid aggressive directive styles that trigger USP survival defenses.
 - Capitalize on Natural Strengths:** Lokheim actively plans and checks goals. Include him directly in co-authoring weekly schedules and transition tasks.
-

3. Stabilization Action Plan

Step 1: Immediate Triage (Days 1–7)

- Identification & License Restoration:** Referral to Midlands Fatherhood Coalition to request out-of-state birth certificate and evaluate Treasury tag debt relief.
- Transportation Setup:** Issue 30-day COMET bus passes for transit routes connecting Main St, Shop Rd, and West Columbia.
- Basic Needs & Income:** Assist with SNAP benefits application and basic hygiene resources.

Step 2: CBT & Skills Maintenance (Weeks 2–4)

- **Workplace Interpersonal Modules:** Complete CBT interactive role-plays covering supervisor communication and workplace frustration tolerance.
- **Relapse & Weapon Avoidance Planning:** Map high-risk environmental triggers and review safety protocols that preserve his freedom.

Step 3: Employment Placement & Community Linkage (Weeks 3–6)

- **Targeted Employer Interviews:** Coordinate transit-accessible interviews with fair-chance partners (e.g., CMC Steel South Carolina, Palmetto State Distribution Center).
- **Prosocial Integration:** Connect workout routine to formal community fitness groups or YMCA programs.
