

Re-entry Navigation Case Plan: Wesley Morton

1. Executive Summary & Diagnostic Profile

- **Participant Name:** Wesley Scott Morton
- **LS/CMI Overall Risk Level:** Medium (Score: 19)
- **Primary Criminogenic Need Domains:**
 - **School / Work (EE):** High Risk (7/9) – Currently unemployed, unstable employment history (longest job 6 months), lacks High School Diploma / GED.
 - **Leisure / Recreation (LR):** High Risk (2/2) – High volume of unstructured idle time without organized prosocial activities.
 - **Substance Abuse (ADP):** Low Current Risk (1/8) – 10 months continuous methamphetamine sobriety, but historical relapse risk remains a critical maintenance target.
- **Static Factors:** Criminal history (Burglary 3rd degree conviction, probation violation) is noted as static and excluded from dynamic intervention planning.
- **Current Residence:** Federal Halfway House (Transitional Housing).

2. Behavioral Dynamics & Responsivity Considerations

- **Prosocial Alignment & Responsivity Strengths:** Wesley demonstrates exceptional prosocial alignment, genuine remorse, acceptance of personal responsibility ('I had a choice'), and strong respect for authority figures. He is highly teachable and responds best to positive reinforcement rather than confrontational styles.
- **Key Behavioral Vulnerabilities:**
 - *'Cut Off' Coping Pattern:* Under high stress or feeling overwhelmed, Wesley historically abruptly disengages and quits obligations.
 - *Impulsivity:* Tendency to act without anticipating consequences.
- **Mentorship Focus:** Lacks consistent positive paternal modeling (father incarcerated). Navigator should provide strong, consistent, prosocial male mentorship and practical vocational coaching.

3. Dynamic Action Plan & Objectives

Domain 1: Education & Employment (EE)

- **Objective:** Establish steady, hands-on employment in logistics, manufacturing, or trades while pursuing GED preparation.
- **Interventions:**
 - Enroll in forklift or HVAC hands-on vocational certification pathways.
 - Target second-chance employers with consistent daytime schedules accessible by public transit.
 - Provide job retention coaching focused on supervisor communication and stress management.

Domain 2: Leisure & Recreation (LR)

- **Objective:** Replace unstructured idle time with structured prosocial routines.

- **Interventions:**

- Map weekly schedule integrating work shifts, recovery meetings, and fitness/recreational activities.
- Support involvement in structured community service or peer support groups.

Domain 3: Structural Stability & Relapse Maintenance

- **Objective:** Maintain 10+ months sobriety and build long-term housing/mobility plan.

- **Interventions:**

- Coordinate with Father to Father Project for driver's license restoration steps.
- Connect with Charleston Center for outpatient peer recovery support.
- Partner with Origin SC and One80 Place for post-halfway house long-term housing navigation.

4. Navigation & Facilitation Protocols

- **Modeling Neutrality:** Avoid power struggles or lectures. Use open questions when Wesley feels frustrated at work or check-ins.
- **CBT Skill Application:** Work through 'Decatastrophizing' worksheets when workplace conflict arises to prevent the 'Cut Off' response.
