

CASE MANAGEMENT BRIEF (STAFF-FACING ROADMAP)

Integrated Clinical Reentry Case Briefing

Participant:	Chance Allen Simmons	DOB / Age:	April 17, 1986 (Age 40)
Housing Status:	Stable, living with family on John's Island	Legal Status:	Reentry Parole Supervision (SC Dept of Corrections)
Completed Score:	23 / 43 (High Risk Band)	Prepared By:	Reentry Program Management

1. RISK PROFILE

Overall Risk Level: HIGH (Score-Based: 23 / 43). This score-based high-risk profile is dominated by a Very High need in Education/Employment, severe static juvenile offense history, and unstructured leisure time, offset by extremely strong protective strengths in family support and prosocial attitudes.

Criminogenic Domain	Score	Reentry Assessment & Clinical Indicators
1. Education / Employment (EE)	7 / 9 (Very High)	Never employed in the community. Complete lack of established work habits, resume, or supervisor relations. GED completed in SCDC.
2. Criminal History (CH)	7 / 8 (High)	Juvenile grand larceny in 2003, followed by rapid escalation to armed robbery, kidnapping, and firearm offenses. Incarcerated for 20 years.
3. Companions (CO)	3 / 4 (High)	Knows quite a few active criminal associates. Lacks established local prosocial, law-abiding close friendships.
4. Leisure / Recreation (LR)	2 / 2 (Very High)	No participation in community activities. High amount of unstructured idle time spent watching TV all day (vulnerable to boredom).
5. Alcohol / Drug Problem (ADP)	2 / 8 (Low)	Admitted drug use within the past year. Currently abstinent at intake, but represents an active risk factor requiring relapse prevention.

SIGNIFICANT PROTECTIVE STRENGTHS (COUNTERVAILING FORCES):

- **Family / Marital (FM) [0/4 - Very Low Risk]:** Resides in an exceptionally warm, supportive, and stable parental home. Family acts as an active protective shield insulating him from criminal peers.
- **Procriminal Attitude/Orientation (PA) [0/4 - Very Low Risk]:** Deep, genuine remorse. Takes full responsibility for his past crimes ('reckless choices that were entirely mine'). Highly compliant, cooperative, and motivated to lead a legal life.

2. BEHAVIORAL INDICATORS (HOW RISK MANIFESTS DAY-TO-DAY)

- **Typical Triggers:** Boredom and unstructured idle time (watching TV); direct contact with active criminal associates in his immediate community; first-ever legal job seeking frustration.
- **Escalation Tendencies:** Historically demonstrated rapid behavioral escalation, progressing from vehicle theft in 2003 to armed robbery with a firearm by early 2004.
- **Decision-Making Patterns:** Learning patience ('No, I learned patience, but I still can get impatient every now and again'). Prone to minor impatience when things are slow but shows strong self-reflection.
- **Authority Response Style:** Highly cooperative, polite, and respectful. Responds exceptionally well to clear expectations, guidance, and counseling professionals.
- **Thinking Patterns Detected:** No active criminal thinking. Deep remorse and 100% accountability. Proactively sought private psychological adjustment counseling upon release to make sure he adjusts properly.

3. PATTERN OVER TIME (LONGITUDINAL trajectory)

First arrested at age 17 in July 2003 for Grand Larceny. Placed on probation, but caught Armed Robbery and Kidnapping charges on January 13, 2004, leading to immediate probation revocation. Adult conviction registered in General Sessions in December 2005. Served nearly 20 continuous years in adult prison. Currently on parole supervision with zero community recidivism post-release. This reentry program represents an intervention in a severe, early-onset static violent pattern.

4. ACUTE / EMERGENCY NEEDS

No acute needs identified at intake. He has stable housing, no active substance abuse crisis, and no mental health instability. Relapse prevention and standard urinalysis are recommended because substance use within the last year is documented, but he is currently stable and abstinent.

5. STRUCTURAL STABILITY FACTORS (BARRIERS TO PROGRESS)

- **Housing:** Stable, supportive home with family on John's Island.
- **License / ID:** Beginner's permit only. Requires transportation support and driver's education.
- **Education:** GED held, but formal schooling ended at 7th grade.
- **Employment History:** None. Critical barrier. Total absence of vocational habits, supervisor experience, or workplace routines.

6. LEGAL & PLACEMENT CONSTRAINTS

No pending charges. Subject to active parole supervision, including standard curfew, travel restrictions, and scheduled check-ins. No Sex Offender Registry requirements.

7. RESPONSIVITY & ENGAGEMENT PROFILE

- **Trauma & Institutionalization:** Serving a 20-year adult prison sentence beginning at age 17 has left significant institutionalization trauma. Reentry planning must accommodate adjustments to modern digital systems, modern workplace pacing, and public life.
- **Engagement Style:** Extremely high internal motivation, highly receptive to faith-based programs (e.g. Kairos) and cognitive-behavioral modeling.

STAFF COACHING RECOMMENDATIONS:

- Utilize an **encouraging, appreciative, and peer-level coaching style** to reinforce his highly positive, cooperative self-concept ('lovable and caring').
- Avoid confrontational or adversarial authority styles, as he is highly sensitive to authority and eager to please.
- Provide hands-on digital literacy and structured job-seeking assistance.
- Actively involve his supportive family in case planning milestones.
