

CASE MANAGEMENT REENTRY BRIEF

PARTICIPANT: Christopher David Barranco (DOB: 05/07/1985) | **REVISED STATUS:** HIGH RISK / NEED

Current Placement:	Oxford House Sober Living (Elected President)	License Status:	SUSPENDED (DUS 1st court pending)
Legal Status:	Active Probation (Kershaw Violation Warrant)	Reentry Agency:	Turn 90 Program (Stipend Participant)

1. RISK PROFILE & CRIMINOGENIC DOMAINS

Christopher's revised LS/CMI assessment calculates a Section 1 Total Score of **21 / 43**, officially elevating him to the **High Risk/Need** category. This risk level indicates that his transition requires highly structured, high-intensity clinical supervision. Per case management protocols, his high Criminal History subscore (7/8) is excluded from need targeting, defining the following prioritized criminogenic need focus areas:

Primary Domain: Alcohol & Drug Problem (ADP Subscore: 5/8) [ELEVATED]: Christopher has a severe, chronic history of substance use beginning at age 13, rooted in an alcoholic upbringing (Al-Anon attendee). His risk has significantly escalated due to active drinking within the last 12 months, leading directly to job losses and a series of arrests. Active recovery safeguards (Oxford House, Return for Christ, Calvary Chapel) are critical to prevent relapse, which is his sole driver of criminality.

Secondary Domain: Education & Employment (EE Subscore: 5/9): Christopher completed his Associate's Degree in Accounting at Midlands Technical College and is highly skilled in roofing, siding, heavy machinery operation, and expert gutter machine installation. However, his current unemployment and lack of a stable payroll history over the past year represent high risks. Because he is currently unemployed, his performance, peer, and authority ratings are programmatically forced to 0, indicating unpracticed workplace behavioral skills.

Tertiary Domain: Procriminal Attitude (PA Subscore: 1/4) [ELEVATED]: Despite displaying profound verbal remorse, Christopher committed multiple property, drug, and child neglect offenses within the last 12 months (shoplifting in March 2025, probation violation in December 2025). This active property offending scores Item 36 (Supportive of Crime) as YES, which programmatically forces Item 42 (Criminal Attitude) to YES in Section 1.8 AP (Antisocial Pattern), raising his AP subscore to 2/4. Case managers must target this active supportive behavior.

2. BEHAVIORAL INDICATORS & THINKING PATTERNS

Christopher's behavior reflects a complex interplay between highly developed prosocial strengths and severe relapse-driven antisocial defaults:

- **Justifying / Minimizing:** Christopher displays a severe justification distortion regarding his adult criminal history. During the diagnostic interview, he claimed 'none' adult convictions, whereas his official Intelius background report documents over ten convictions for forgery, shoplifting, grand larceny, drug possession, and child neglect. Staff must gently confront this gap with collateral records to build honest self-reflection.

- **Relapse-Driven 'Cut Off' Pattern:** Christopher has a long-standing history of quitting work or being terminated abruptly, admitting that 'every job I've ever lost was because of my own fault relapsing... starting with drinking.' Drinking acts as his cognitive 'Cut Off' coping default under acute financial or emotional distress.
- **Prosocial Leadership (Protective Strength):** In a remarkable strength, Christopher was elected President of his Oxford House and serves as an active usher/chef for family dinners at Calvary Chapel. He has strong self-regulation habits when sober—setting explicit plans and goals, writing them down, and reviewing them regularly. Staff must leverage this leadership capacity to reinforce his self-esteem.

3. TRAJECTORY & PATTERN OVER TIME

Christopher's legal involvement began at age 11 with an arrest in Florida for trespassing, establishing early-onset juvenile delinquency (4 juvenile convictions). In adulthood, he developed an entrenched, 20-year cycle of non-violent property offending, drug possession, and domestic conflicts. His criminal career has heavily escalated recently, culminating in child neglect convictions (2021) and active probation violations (December 2025). The cycle we are interrupting is a chronic, substance-fueled collapse where active drinking instantly dissolves his high intellectual and professional capabilities, sending him back into property crime and community supervision failures.

4. ACUTE / EMERGENCY NEEDS

- **Active Probation Violation Warrant:** Immediate administrative coordination is required with his probation agent (Burgess) and Kershaw County PPP regarding his active December 12, 2025 probation violation warrant to prevent sudden re-arrest.
- **Transitional Income & Financial Crisis:** Currently has 0 active income, relying entirely on food stamps and his small Turn 90 stipend. This financial strain is an active relapse trigger.
- **Active DUS Charge:** Has an outstanding pending traffic court status in Lexington for Driving Under Suspension (DUS 1st) stemming from March 2025.

5. STRUCTURAL STABILITY FACTORS

- **Oxford House Placement (High Stability):** Extremely stable and supportive sober-living environment. His role as President provides massive structural accountability.
- **Severe Physical Trauma (Loss of Lung):** He was shot in the chest during a drug dispute in his past, resulting in the surgical loss of half of his left lung. This remains a permanent physical vulnerability and a chronic PTSD/anxiety trigger.
- **Transportation Barrier:** Suspended driver's license due to traffic debt. All travel relies strictly on public transit or sober-living peers.
- **High Debt Load:** Owed \$3,500 to Landmark in Lexington and receives harassing creditor calls, causing severe anxiety.

6. LEGAL & PLACEMENT CONSTRAINTS

Christopher has an active probation status out of Kershaw and Lexington Counties, with documented supervision failure history. His suspended license restricts physical transit, and he must avoid any workplace placements where drugs or alcohol are present on-site. He has no Sex Offender Registry requirements.

7. RESPONSIVITY & ENGAGEMENT PROFILE

- **Trauma-Informed, Collaborative Style:** Due to his severe physical trauma (gunshot wound, loss of half a lung) and childhood trauma (alcoholic parent, running away), staff must utilize a highly supportive, calm, and collaborative coaching style. Aggressive, directive, or confrontational tactics will trigger survival-based defensiveness or anxiety.
- **Leverage Accounting Background for Debt Management:** Capitalize on his Midlands Tech Accounting Associate's degree. Involve him directly in co-creating his budget and a structured 'Debt Snowball' plan to manage his \$3,500 Landmark debt, which will reduce his financial relapse triggers.

- **Safe, Drug-Free Employment Matching:** Leverage his expert gutter installation, roofing, and heavy machinery certifications. Placements must be rigorously vetted to ensure they are 100% drug-free. Christopher explicitly notes that past jobs with drug-using crews triggered his relapses; matching him with prosocial, sober work environments is mandatory for his recovery.
- **Address Denial and Minimization Supportive:** Use Cognitive Behavioral Therapy (CBT) to supportively address his minimization of his adult record. Connect his admitting of past relapses to the Intelius collateral records, helping him bridge the narrative gaps with accountability and self-forgiveness.
