

CASE MANAGEMENT BRIEF

1. Risk Profile

- **Overall Risk Level:** Very High (35)
- **Top 3 Criminogenic Domains:**
 1. Alcohol/Drug Problem (Very High)
 2. Education/Employment (High)
 3. Companions (Very High)
- **Brief Domain Indicators:**
 - **Alcohol/Drug Problem:** Continued use of alcohol and occasional cocaine; substance use has directly contributed to job loss and recent probation revocation (DUI).
 - **Education/Employment:** Currently unemployed with a suspended driver's license severely limiting opportunities; longest continuous employment history is only six months.
 - **Companions:** Primary peer network is heavily involved in illegal activities and substance use; lacks prosocial, antiscriminal friendships.

2. Behavioral Indicators

- **Typical Triggers:** Interpersonal conflict, perceived disrespect, or feeling challenged.
- **Escalation Tendencies:** Reacts impulsively with physical aggression; struggles to think through consequences before acting.
- **Decision-Making Patterns:** Prone to risk-taking (e.g., drunk driving) and uses cognitive distortions to minimize harm and deflect responsibility onto victims or circumstances.
- **Authority Response Style:** Harbors a deep-seated belief that the justice system is rigged against him, though he can maintain compliance with direct supervisors (e.g., his probation officer).
- **Substance Relapse Patterns:** Uses substances to cope with idle time and stress; substance use consistently precedes non-compliance and legal issues.

3. Pattern Over Time

- **Age at first justice involvement:** 15 (shoplifting).
- **Number/frequency of incarcerations:** 1 state prison term (14 months).
- **Recidivism timing patterns:** Violated probation while under community supervision by committing a new offense (DUI).
- **Escalation or stability trends:** Has escalated from juvenile property crime to adult drug possession and violent offenses (simple assault).
- **Supervision violation history:** High risk of non-compliance; current probation was revoked due to the recent DUI charge.

4. Acute / Emergency Needs

No acute needs identified at intake.

5. Stability Factors

- **Housing stability level:** Currently housed with his mother, but the living environment is tense and characterized by frequent arguments.
- **Driver's license status:** Suspended (significant barrier to securing and maintaining employment).
- **Education credential status:** Achieved GED while incarcerated.
- **Recent substance use:** Active alcohol and cocaine use.
- **Employment history pattern:** Sporadic and low-tenure; jobs frequently end due to substance-related attendance issues or incarceration.
- **Supervision intensity:** Under active supervision following probation revocation.

6. Legal & Placement Constraints

- **Pending charges:** Active DUI charge.
- **Court obligations:** Owes approximately \$500 in outstanding court fees.
- **Supervision restrictions:** Standard conditions apply; transportation limited by license suspension.
- **Sex Offender Registry requirement:** No.
- **Movement/contact restrictions:** None explicitly noted.

7. Responsivity & Engagement Profile

- **Literacy limitations:** None identified; successfully completed GED.
- **Cognitive considerations:** None identified.
- **Trauma reactivity:** Highly reactive to perceived disrespect or challenges to his ego.
- **Authority sensitivity:** Exhibits anti-authoritarian attitudes, viewing the legal system as intrinsically unfair and corrupt. Will require a collaborative, fair approach to build a working alliance.
- **Motivation style:** Pre-contemplative regarding his behavior. Exhibits significant denial and minimization, particularly regarding his violent actions and the severity of his substance use.
- **Learning preferences:** Will likely benefit from concrete, non-confrontational cognitive-behavioral interventions targeting impulse control, anger management, and consequential thinking.
